

In January 2018, education leaders from across the Centers for Disease Control and Prevention (CDC) finalized eight science-based training standards. They serve as a measure of quality for any trainings developed or funded by CDC and provide training developers with guidance for developing quality training.

## *A quality training is one that meets all eight standards*

- 1 Training **NEEDS ASSESSMENT** informs training development
- 2 Training includes **LEARNING OBJECTIVES**
- 3 Training content is **ACCURATE AND RELEVANT**
- 4 Training includes opportunities for **LEARNER ENGAGEMENT**
- 5 Training is designed for **USABILITY AND ACCESSIBILITY**
- 6 Training **EVALUATION** informs improvement
- 7 Training includes opportunity for **LEARNER ASSESSMENT**
- 8 Training includes **FOLLOW-UP SUPPORT** for the learner
